PROFESSIONAL SUMMARY

Analytical operations and project management professional with nearly a decade of experience supporting federal transportation, maritime, and defense-related programs. Experienced coordinating complex projects involving multiple stakeholders, managing schedules and deliverables, analyzing procurement and operational data, and developing tools that improve efficiency and decision making. Recognized for exceptional attention to detail, responsiveness, and the ability to manage competing priorities in fast-paced environments. Advanced Excel, SQL, Python, and data management skills with extensive experience supporting government clients and mission-critical projects.

EXPERIENCE

Consulting / Software & Design 2025 - Present

- Design and manage end-to-end software and database projects.
- Build analytical tools using Python and SQL.
- Develop customer-facing web applications.
- Improve workflows through automation and reporting.

US Department of Transportation – Volpe National Transportation Systems Center, Cambridge, MA 2017 - 2025

Transportation Economist

- Managed multiple concurrent federal research and operational projects supporting agencies including the Department of Defense, MARAD, FMCSA, FRA, and FHWA.
- Coordinated project schedules, deliverables, and communications among federal clients, technical teams, and external stakeholders.
- Evaluated costs, pricing structures, and operational alternatives to support procurement and policy decisions.
- Developed automated reporting and tracking systems that reduced multi-week reporting processes to only a few hours.
- Created dashboards and analytical tools using Excel, SQL, Power BI, Python, and R to monitor project status and support executive decision making.
- Reviewed complex grant applications and supporting documentation to verify compliance with federal requirements.
- Managed large datasets while maintaining exceptional accuracy and documentation standards.
- Produced technical reports and presentations for senior federal leadership.
- Supported defense and maritime logistics projects involving operational planning, forecasting, and transportation analysis.

San Francisco State University, San Francisco, CA 2016 - 2017

Adjunct Instructor

- Taught introductory microeconomics.
- Presented complex analytical concepts to diverse audiences while emphasizing practical application.

Advera Health Analytics, Santa Rosa, CA 2016 - 2016

Junior Data Analyst

- Health and pharmaceutical price and effectiveness data analysis.
